

# Occupancy Monitoring Solution

**BANNER**  
more sensors, more solutions

## Crowd Monitoring Made Simple

### *An easy-to-implement solution that supports social distancing*

Creating a safe environment for your customers and staff is essential to doing business. For many businesses, implementing social distancing solutions is now necessary to **control the flow of customers through a store**.

Banner's occupancy monitoring solution makes it easy to **keep a constant, accurate count of the number of customers** in your store and notifies you as you approach full capacity.

- **Automates the monitoring** of entrances and exits using optical sensors
- Provides familiar **green / yellow / red indication** to customers
- **Setup is quick and easy**, requiring no alterations to area infrastructure (Our Counters & Sensors are wireless)
- **Notifies** staff as customer **count** approaches capacity
- Offers **optional reporting** to identify trends in customer traffic
- Our controllers are able to **communicate with other devices** (Eg: Infrared thermometers, barcode scanners, cameras, etc)
