Feel the Difference

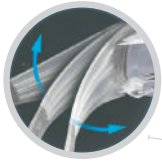

# Designed for comfort. Designed for you.

When it comes to eye protection, the right fit makes all the difference. The 3M™ SecureFit™ Protective Eyewear Alternate Fit SF300 Series features an adjusted lens angle and soft nose bridge designed to help accommodate tall cheekbone structure and low nose bridge height. Proprietary Pressure Diffusion Temple (PDT) technology further enhances comfort without compromising security.

# Comfort and protection by design.

## Contemporary and lightweight

Weighs less than 1 ounce.

## Secure, comfortable fit

Proprietary 3M™ Pressure Diffusion Temple (PDT) Technology minimizes pressure over the ear without compromising security.

## Angled for comfort

Lenses are angled to help accommodate high cheekbone structure.

## Coated for clarity

Available with Anti-fog or Anti-scratch lens coating.

## Soft nose pads

Designed to fit securely on a low nose bridge.

## UV and impact protection

Polycarbonate lenses absorb 99.9% of UVA and UVB rays and meets the requirements of ANSI Z87.1-2015 Standard as an Impact Rated Spectacle.

## What is Alternate Fit?

Alternate Fit expands the fit of eyewear to multiple face shapes and sizes using design adjustments such as:

- Adjusted lens angle to help accommodate high cheekbone structure
- Soft nose pads designed to fit securely on a low nose bridge
