

PRO CUT 5 IMPACT GLOVE

Designed to protect hands from injuries caused by impacts, abrasions, cuts, and other hazards in various work environments.

FEATURES

Impact Protection	Thermoplastic Rubber (TPR) panels on the back of the hand and fingers to absorb and disperse impact forces.
Cut Resistance	High-performance liners for protection against cuts and lacerations.
Palm Coating	Flexible sandy coating on the palm for enhanced grip and abrasion resistance.
Reinforced Areas	Reinforced thumb crotch patches for enhanced durability.
Flexibility and Dexterity	Design features that allow for flexibility and dexterity, ensuring that the gloves do not hinder hand movements.
Breathability	Materials and designs that promote airflow to keep hands cool and comfortable.
Grip	Sandy coatings on the palm and fingers to provide superior grip in wet, oily, or dry conditions.
Comfort	Ergonomic design and padded areas for improved comfort during extended use.
Knit Wrist or Cuff	Knit wrist design prevents dirt and debris from entering the glove while ensuring a snug fit.
High Visibility	Bright colors or reflective strips for enhanced visibility and safety in low-light conditions.
Machine washable	Ability to be cleaned and reused without losing protective properties.

CERTIFICATION

Mechanical Hazards		Performance Level
EN388:2016  4 5 4 4 E P	4 Abrasion Resistance	1-4
	5 Circular Blade Cut Resistance	1-5
	4 Tear Resistance	1-4
	4 Puncture Resistance	1-4
	E Straight Blade Cut Resistance	A-F
	P Impact Resistance	P, F, X
